Possess Active Public Trust & IRS MBI Clearance

TECHNICAL SKILLS

- Cloud: AWS (IAM, EC2, S3, VPC, Security Groups), Docker, Kubernetes
- Security Tools: SIEM (Splunk, ELK), EDR/XDR, WAF, SAST/DAST (Snyk, SonarQube), Dependency Scanning, OWASP Top 10
- IaC/Automation: Python, Helm, Pulumi, Bash, PowerShell
- Compliance: NIST Frameworks, SOC 2, ISO 27001
- CI/CD: Jenkins, GitLab CI, GitHub Actions

WORK HISTORY

RYJ CONSULTING

Cloud Security Engineer

May 2025 – Present, Remote

- Monitors and responds to security alerts from SIEM, EDR, and cloud-native tools within an AWS environment.
- Contributes to the vulnerability management program by running scans, analyzing findings, and coordinating remediation efforts with development teams.
- Assists in securing CI/CD pipelines by integrating SAST, DAST, and dependency scanning tools, helping to identify vulnerabilities before deployment.
- Supports incident response activities by performing initial triage, collecting evidence, and documenting actions taken. Develops and maintains Python scripts to automate repetitive security tasks, such as alert enrichment and compliance checks.

Cloud Security Specialist

Oct 2021 – Dec, 2023, Remote

- Supported the SECURE/SRMA project by monitoring cloud environments and containerized workloads for misconfigurations and vulnerabilities.
- Assisted in compliance by collecting evidence and running checks against NIST and SOC 2 control frameworks.
- Analyzed IaC templates (Helm, Pulumi) for security flaws and alignment with organizational best practices.
- Contributed to vulnerability management reports, tracking and reducing open vulnerabilities in containerized environments
- Helped tune WAF rules and analyze logs to protect applications from common web-based attacks (OWASP Top 10).

INTERNAL REVENUE SERVICE (IRS)

Oct 2024 – Apr 2025, Remote

Cloud Security Analyst (IRS SECURE/SRMA Contract) | Deloitte

- Performed 24/7 monitoring of security alerts using SIEM and EDR tools, escalating critical incidents as per procedure.
- Conducted initial triage of phishing reports and web alerts, identifying and containing threats to reduce impact.
- Assisted in tuning and maintaining security tools, including antivirus, EDR, and WAF rules.
- Created documentation for incident response procedures and common alert-handling playbooks.

LOG N PACIFIC

Jan 2024 – Oct 2024, Remote

System Administrator

- Managed and maintained Windows/Linux servers, including patch management and system hardening, which reduced security vulnerabilities by 25%.
- Administered core IT infrastructure, including Active Directory, networking (firewalls, VPNs), and virtualization.
- Supported a hybrid environment with user and resource management in both on-premise and AWS (IAM, EC2, S3) platforms.
- Wrote PowerShell and Bash scripts to automate system maintenance, user provisioning, and software deployments.

PROJECT

Automated Compliance Reporting Tool 2024

Developed a Python-based utility to automate the collection and formatting of compliance evidence from cloud environments. The project's business value was in reducing the manual effort for SOC 2 and ISO 27001 audits, allowing the security team to focus on remediation rather than data gathering.

- Wrote Python scripts to query AWS APIs (for IAM policies, S3 bucket permissions, and security group rules) and compare configurations against predefined NIST/SOC 2 baselines.
- Integrated with a SIEM API to automatically pull quarterly access review logs and container vulnerability scan results, formatting all outputs into a consolidated report.

EDUCATION

Western Governors University (WGU)

B.S. in Cybersecurity and Information Assurance

Relevant Coursework: Cloud Architecture, Systems Design, Automation

Salt Lake City, UT

Graduating in Sep 2025

Information Technology and Communication College (ESTIC)

B.S in System and Network Administration

Lubumbashi, D.R. Congo

Graduated in Dec 2018

CERTIFICATIONS

- Microsoft Certified: Azure Administrator Associate (AZ-104)
- Pursuing: CCSP, and AWS Certified Security Specialty Certification (SCS-C02)
- CompTIA Security+, CySA+, Pentest+, and Project+
- SSCP (Systems Security Certified Practitioner)
- Linux Essentials – LPI
- ITIL Foundation V4
